OBJECTIVE

A motivated Computer Science student with hands-on experience in machine learning, AI-driven applications, and backend development. Currently exploring the intersection of AI/ML and cybersecurity through practical projects, with a strong interest in building intelligent systems for threat detection and data-driven decision making. Seeking an internship opportunity to apply and expand my AI/ML, cybersecurity, and software development skills while contributing to impactful and innovative technology solutions.

EDUCATION

Birla Institute of Technology and Science, Pilani, Dubai Campus

Bachelor of Engineering (B.E.) in Computer Science

Currently in Third year

Expected Graduation: June,2027

SKILLS

- **Programming Languages:** Python, Java
- **Machine Learning and AI:** Scikit-learn, Feature Engineering, Data Preprocessing
- **Web Development:** HTML, React
- **Tools & Technologies:** Git, Linux, MySQL, Power Bi, Excel, PowerPoint
- **Soft Skills:** Organized, Time-management, Teamwork, Excellent communication, Detail-oriented, Adaptable to learning new technologies

WORK EXPERIENCE

BACKEND DEVELOPER INTERN | AIINHOME TECHNOLOGIES PVT. LTD.

(June 2025 - November 2025)

- Helped in **developing RESTful APIs** to support core business functionality, **improving data retrieval efficiency.**
- Built and optimized backend modules using Python
- **Fine-tuned LLMs** on domain-specific datasets to improve its performance
- **Integrated MySQL databases** for data storage and management and worked with ERP and CRM data (including Salesforce).
- Worked with tools like **Git** for version control, **testing** and **deployment.**
- Contributed to **debugging** and **resolving backend issues**, reducing bug resolution time.

PROFESSIONAL ASSISTANT (PA) | Deputy Registrar’s Office – BITS Pilani Dubai Campus (April 2026 – Present)

- Assisted with administrative coordination, documentation, and internal office operations.
- Supported record management and communication between academic and administrative departments.
- Helped maintain organized documentation.

PROJECTS

A.I.R.O. : AI-Driven Cybersecurity Threat Detection System –

Tech: Python, Scikit-learn, Machine Learning, Network Security

- Developed an ML-based system to detect and mitigate cyber attacks including: **Port Scanning, SQL Injection, Malware C2, and Phishing.**
- Created **custom simulated datasets (~26,000 records)** representing attack and normal traffic patterns.
- Trained and evaluated multiple ML models (**Logistic Regression, Decision Tree, Random Forest, SVM, Gradient Boosting**) for attack classification.
- Implemented a **detection pipeline and automated mitigation engine** to block malicious activity. Achieved **~87% detection accuracy** on simulated attack datasets.

Brain Tumor MRI Classification using Deep Learning-

Tech: Python, TensorFlow, Scikit-learn, OpenCV, Flask

- Built a **multi-model brain tumor detection system** classifying MRI scans into four categories using **ResNet50, VGG16, custom CNN, SVM, and Random Forest.**
- Used **transfer learning and feature extraction** to improve accuracy and enable lightweight ML baselines.
- Implemented **data preprocessing, augmentation, and model evaluation pipelines** with visualization of results.
- Developed a **Flask-based inference API and web interface** for MRI image prediction.
- Achieved **~84% test accuracy** with **Random Forest** and **above 70%** for the remaining four models.

Secure Suite: A Reporting Tool made using VAPT and OSINT-

- It takes an **IP address or domain as input** and then **performs several automated checks** including **nmap scanning, OSINT lookups** and, **basic web vulnerability scanning.**
- It then **generates a detailed report in both plain text and PDF formats** for easy sharing and analysis.

CERTIFICATIONS

Cybersecurity and Ethical Hacking (Academy of Skill Development)

- Mastered the fundamentals and basics of cybersecurity
- Gained hands-on experience in **VAPT** using tools like **Nmap, Burp Suite and Metasploit**
- Worked in simulated environments to **exploit vulnerabilities ethically** and document findings in professional style security reports
- Developed awareness of **cyber laws, ethical guidelines, and real-world attack methodologies**

The Web Developer Bootcamp 2025 (Udemy)

- Mastered latest and up to date technologies of **both backend and frontend.**

EXTRACURRICULAR ACTIVITIES

- Participated in the **International Healthcare Hackathon** conducted by **IIIT Sri City.**
- Volunteered for BITS Pilani Dubai's inter-college cultural fest, **Jashan** as part of the **Logistics and Registration Team.**
